

These charts and tables were created by the Fiscal Research Division, a nonpartisan central staff division serving all members of the North Carolina House of Representatives and State Senate.

This chart shows the change in the number of non-farm jobs in North Carolina since 1980; it also shows how the industries that comprise those jobs have changed over time. See page two for a detailed table of figures.

Notes:

- 1) "Non-Farm Employment" is a measure of the number of workers in most non-agricultural industries in the State. The data exclude some groups of workers, including the military, private household employees, unincorporated self-employed people, and the non-profit sector.
- 2) Data are compiled quarterly by the U.S. Bureau of Labor Statistics, are seasonally adjusted, and were provided by Moody's Analytics. Data represent the first quarter (March 31) of each calendar year.

North Carolina Non-Farm Employment in Thousands (Seasonally Adjusted)

Industry Sector	1980	1985	1990	1995	2000	2005	2010	2015	2020
Manufacturing	834	815	837	834	765	571	431	459	477
Trade, Utilities, & Transport.	445	508	640	659	748	734	709	784	847
