Notes:

- (1) GSP is the market value of goods and services produced by labor and property in a given state. It is an approximate measure of total economic output.
- (2) Current GSP components are compensation of employees, taxes on production and imports, and gross-operating surplus.
- (3) The charts adjust for inflation with a common year of 2017. Population and GSP estimates are derived from the fourth quarter of each calendar year.
- (4) GSP data is from the US Bureau of Economic Analysis. Annual population data for per capita statistics are from the US Census Bureau.
