

These charts and tables were created by the Fiscal Research Division, a nonpartisan central staff division serving all members of the North Carolina House of Representatives and State Senate.

This chart shows the change in the number of non-farm jobs in North Carolina since 1983; it also shows how the industries that comprise those jobs have changed over time. See page two for a detailed table of figures.

Notes:

- 1) "Non-Farm Employment" is a measure of the number of workers in most non-agricultural industries in the State. The data exclude some groups of workers, including the military, private household employees, unincorporated self-employed people, and the non-profit sector.
- 2) Data are compiled quarterly by the U.S. Bureau of Labor Statistics, are seasonally adjusted, and were provided by Moody's Analytics. Data represent the fourth quarter (Dec 31) of each calendar year.

North Carolina Non-Farm Employment in Thousands (Seasonally Adjusted)

Industry Sector	1983	1988	1993	1998	2003	2008	2013	2018	2023
Manufacturing	816	839	820	788	580	499	445	478	471
